# GPO User Guide

## What is Group Policy?

Group Policy (GPO), a feature of the Microsoft Windows NT family of operating systems, is a set of rules that control the working environment of user accounts and computer accounts. It offers the centralized management and configuration of operating systems, applications, and users' settings in an Active Directory environment.

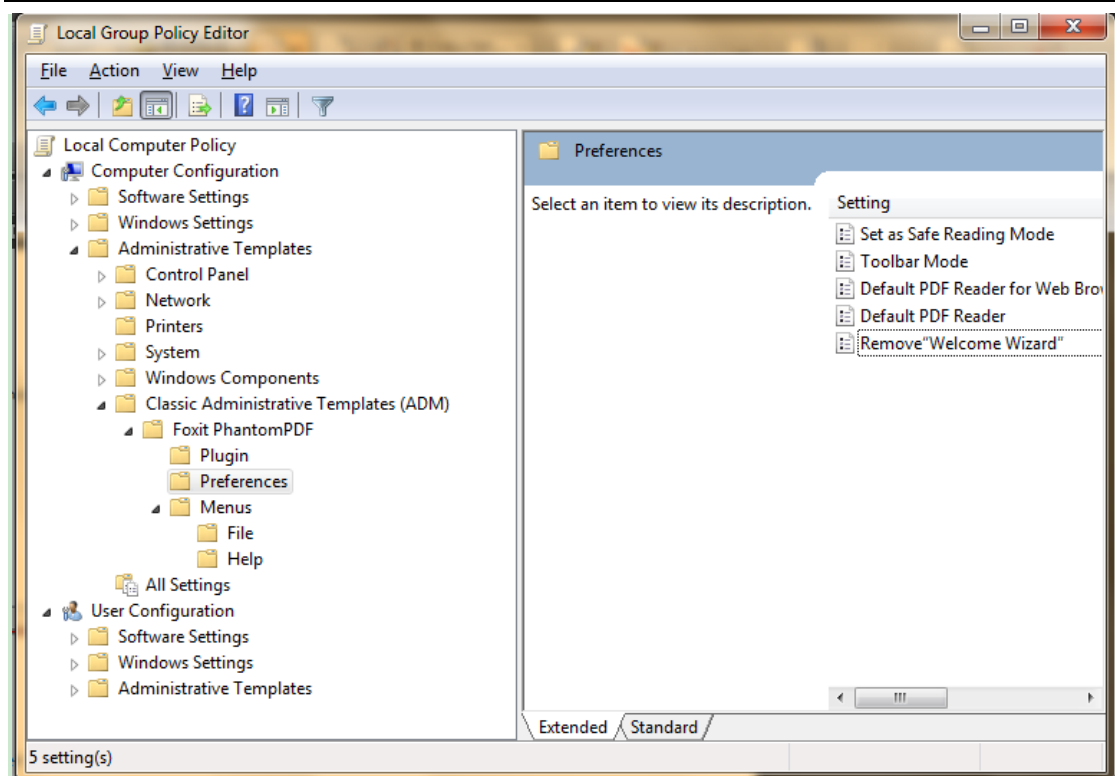

Group Policy can configure most system settings, save power by utilizing smart power settings, give individual users more control over their machines with administrator privileges and increase system security.

This guide will introduce steps to help you master how to quickly add and modify the new GPO template for configuring your installation of Foxit Reader.

## Personal Computer Setting

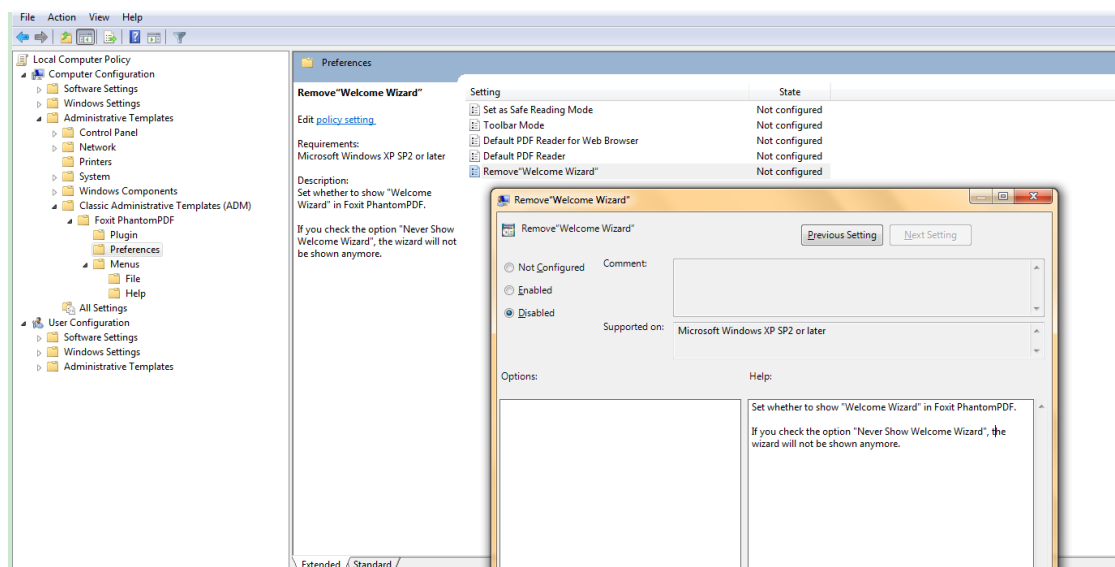

### Set Template Preference

- Please click Start > Run or use the shortcut key Ctrl + R and type gpedit.msc to open Group Policy Editor.
- Right-click the management template and choose **Add/Remove Template** in the context menu. In the opened dialogue box, add the group policy template of Foxit PhantomPDF (Foxit PhantomPDF\_enu.adm). The Foxit PhantomPDF template will appear in the left navigation pane and you can set its template preferences.

### Example: Disable Welcome Wizard

- Choose Foxit PhantomPDF > Preferences > Remove “Welcome Wizard”.
- Double-click **Remove “Welcome Wizard”** to open the dialog box and check the option **Enabled**. Welcome Wizard will not appear after users finish the installation and start the application for the first time.
- If check the options **Not Configured** or **Disabled**, the Welcome Wizard will be displayed and set with the original logic of PhantomPDF.

- Other options are configured in the same fashion.

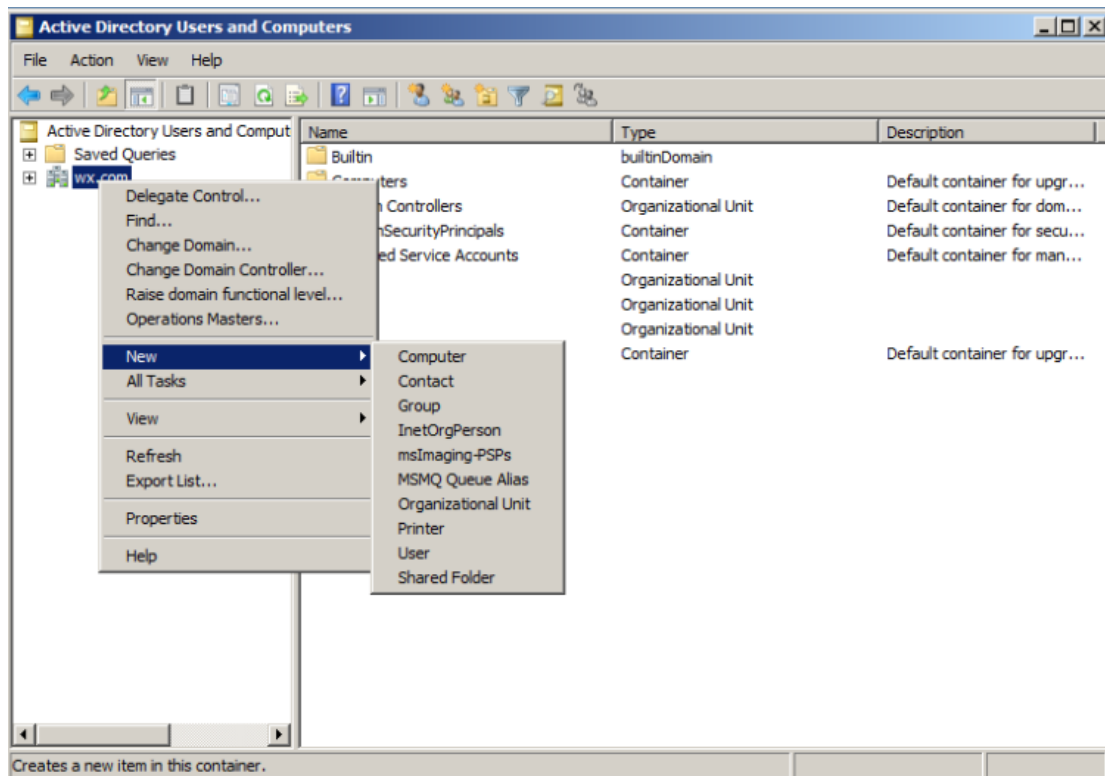

**Note:** Group Policy setting includes computer configuration and user configuration.

Computer configuration takes precedence over user configuration. The application will use the computer configuration if both the computer and user configure a specific function at the same time. Please note that if the option **Disabled** is a valid configuration, the setting will be shown in the help information. If not, the corresponding registry entry will be removed as selecting Unconfigured. (The value of the option Disabled in the Group Policy Template of Foxit Enterprise Reader is invalid.)

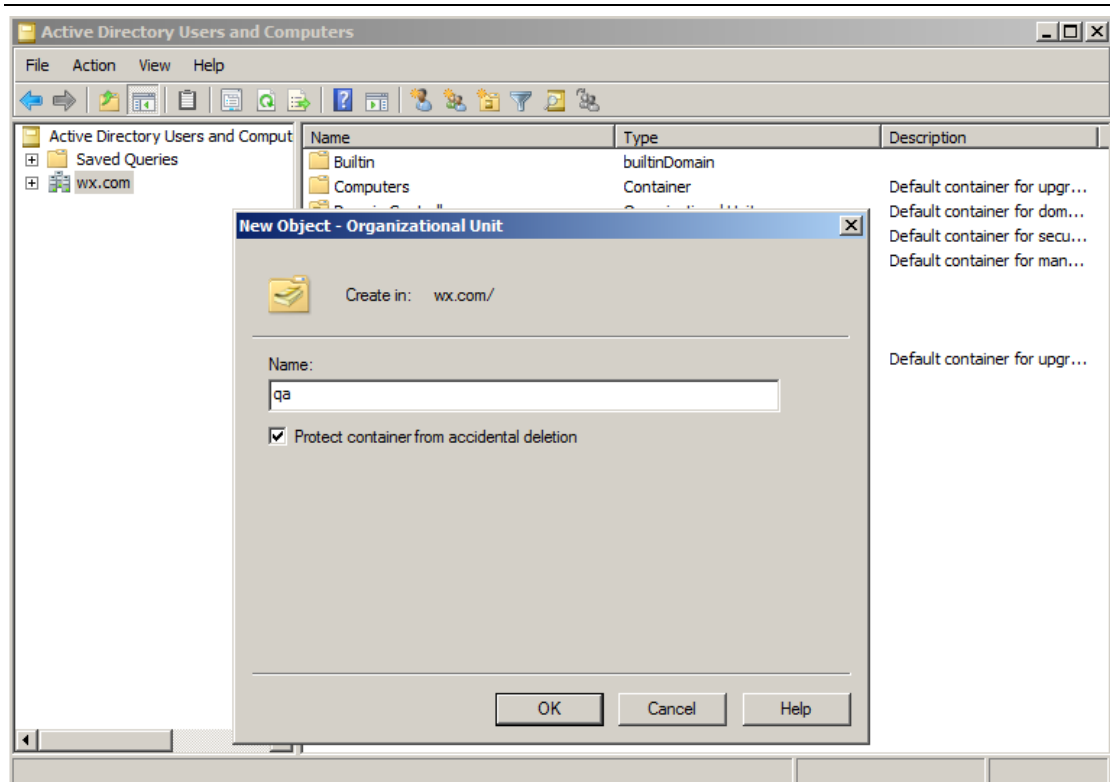

## GPO Deployment (for Server)

### Create GPO Management

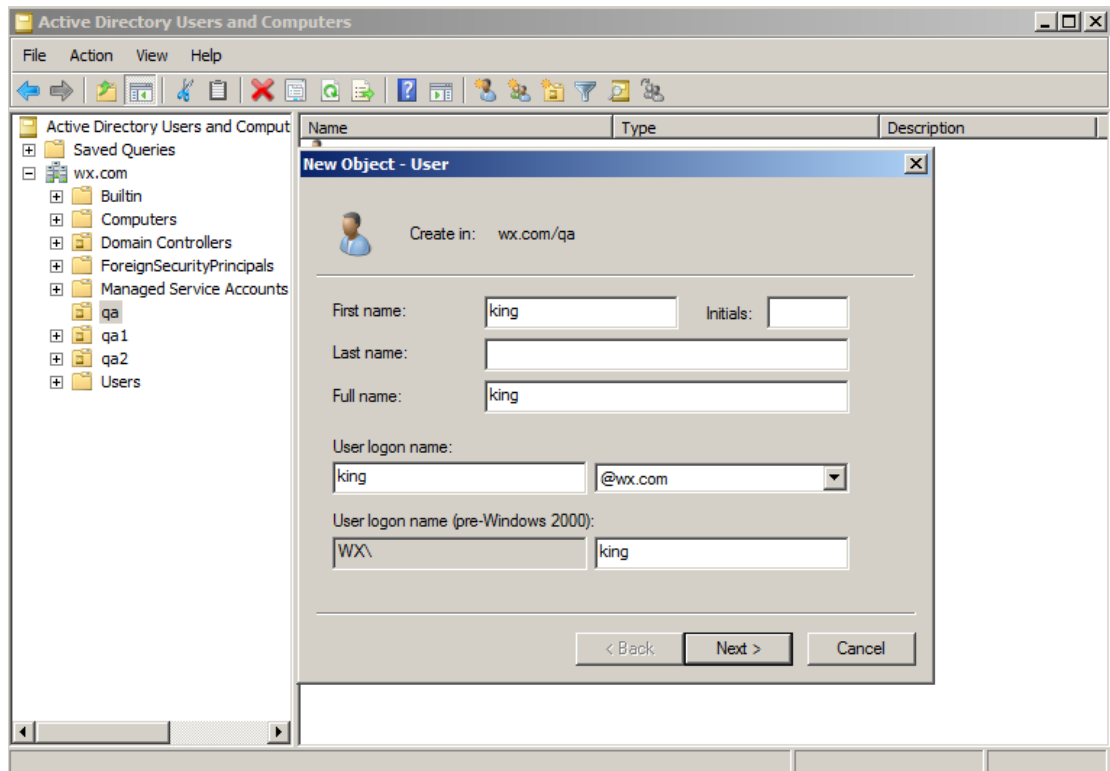

- If you already have an Active Directory domain and organizational unit configured, please skip to “Apply the Foxit Template” section.
- Choose Start > Administration Tools > open “Active Directory Users and Computers” > right-click the field “wx.com” > choose New > Organization Unit in the right-click menu.

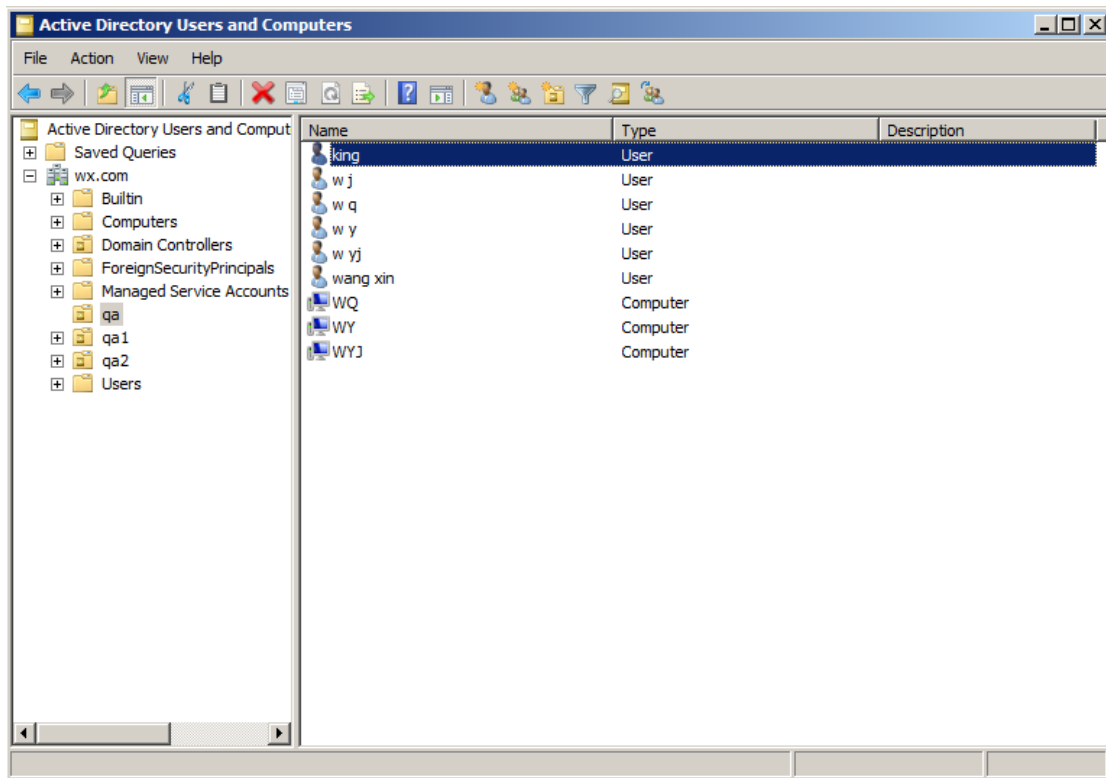

- In the opened New Organization Unit dialogue box, type the unit name (For this example, we have named the unit “qa”) and click OK.

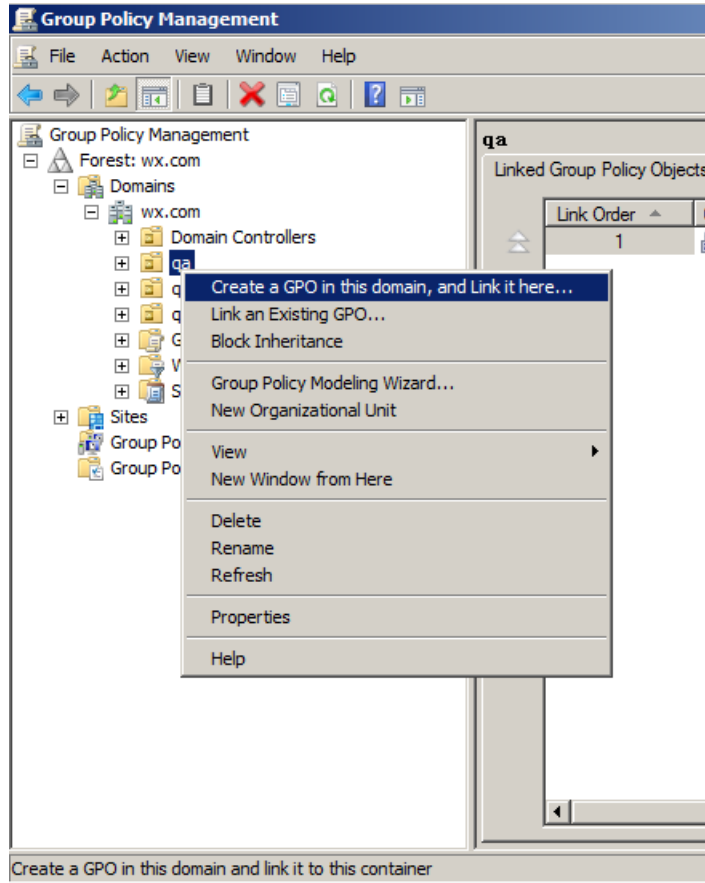

- Right click the created organization unit “qa” and choose New > User in the right-click menu. For this example, we have named the user “King”

- Click Start > Programs > Administration Tools > open the Group Policy Management Console and right-click the created organization unit “qa” and choose **Create and Connect GPO**.

If you cannot find the Group Policy Management in Administration Tools, please install the application package GPMC.MSI. You can download the package by clicking the link <http://www.microsoft.com/windowsserver2003/gpmc/default.mspx>.

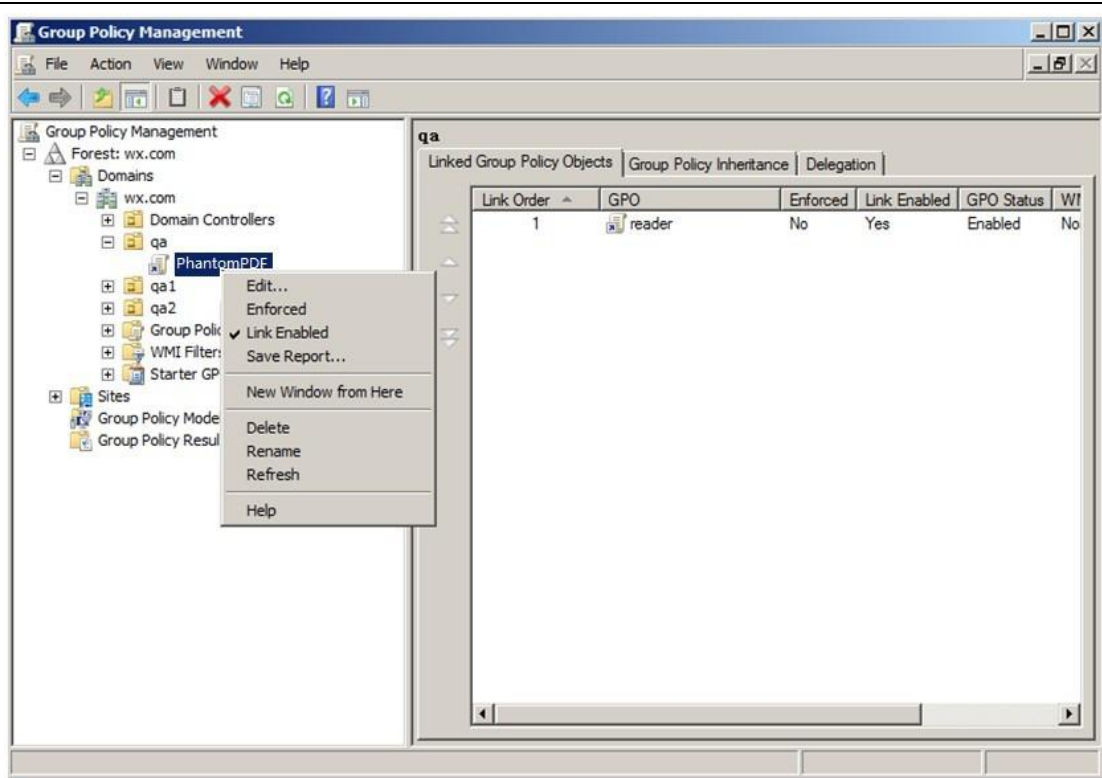

## Apply the Foxit Template

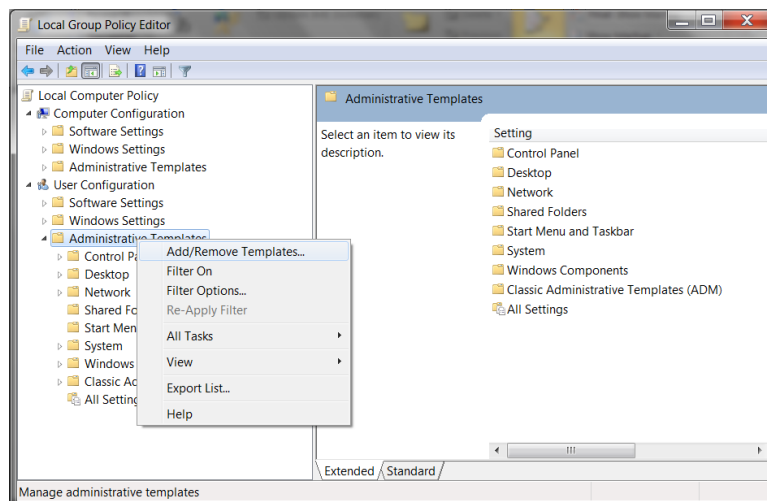

- Type the GPO name in the “Create GPO” dialogue box and click OK.

- Right-click the new GPO and choose Edit in the right-click menu to open Group Policy Editor.

- Right-click the Template Management and choose Add/Remove Template to add Foxit PhantomPDF\_enu.adm. Please refer to [Set Template Preference](#).

- For configuring options, please refer to [Example: Disable Welcome Wizard](#).

## GPO Items

The following table introduces some simple manipulations in GPO to speed up your working process.

### Items in GPO Template

Folder Path	Item	Options	Description
Foxit PhantomPDF > Plugin	Disabled Plugin List	Remove plugins listed on the left dialogue box.	Add plugins which need to be disabled. Users need to enter the file name of the plugins in the program folder: \Program Files\Foxit Software\Foxit PhantomPDF\plugins. Only supported plugins have .fpi extension.
Foxit PhantomPDF > Preferences	Set as Safe Reading Mode	Set as Safe Reading Mode.	Check the option in Preferences > Trust Manager.
		Forbid modification in Foxit PhantomPDF.	Grey the setting in Preferences > Trust Manager.
Foxit PhantomPDF > Preferences	Default PDF Reader for Web Browser		<ol style="list-style-type: none"> <li>1. Set Foxit PhantomPDF as the default PDF Reader for web browser.</li> <li>2. Remove Settings in Preferences&gt;File Associations.</li> </ol>
Foxit PhantomPDF > Preferences	Default PDF Reader	Remove the menu item: "Set as the Default Reader".	Only remove the item of "Set to Default PDF Reader" under the "Help" menu.
		Set as the Default Reader.	<ol style="list-style-type: none"> <li>1. Set PhantomPDF as default PDF Reader.</li> <li>2. Remove the item of "Set to Default PDF Reader" under the "Help" menu.</li> </ol>
Foxit PhantomPDF > Preferences	Toolbar Mode	Tabbed Toolbar Mode.	Set Tabbed Toolbar Mode as the default toolbar mode. Users can change the style by choosing Basic > Change Style.
		Forbid modification in Foxit PhantomPDF.	Forbid changing the toolbar mode. If both of the two options are checked, users cannot change the toolbar mode anymore.

**Foxit PhantomPDF GPO**  
**User Guide**
